

EXPERIMENT 2

PROPERTY BUYING

Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Buy, Rent, commercial, Rental Agreement , Rental Agreement, Area, place, Range, property value etc.

AIM:

To design and deploy a cloud-based Property Buying and Rental Management System for Chennai city on Zoho Creator to process buy/rent requests, filter by prime Chennai areas, capture rental agreement details under the Tamil Nadu Tenancy Act, and evaluate property values automatically.

PROCEDURE:

1. Create a new form named Property Management System in Zoho Creator.
2. Add fields for Transaction Type, Property Category, Area, and Specific Place.
3. Include fields for Property Value, Rent Range, Advance, and Agreement Tenure.
4. Set rules to hide Rental Agreement fields when Buy is chosen.
5. Configure validation to verify non-negative budget inputs and mandatory location entries.
6. Setup an On Success workflow to generate tenancy tracking and notifications.
7. Test the full application to confirm field rules and data processing.

RESULT:

A cloud-based Property Buying & Rental System for Chennai city was successfully created and deployed on Zoho Creator. It effectively processes buy and rental entries across popular Chennai localities (e.g., Adyar, Velachery, Anna Nagar), applies dynamic field rules for sales versus lease documents, and automates real estate inquiry workflows.
