

EXP NO 1: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION AND PROVIDE IT AS A SERVICE USING ANY CLOUD SERVICE PROVIDER TODEMONSTRATE SOFTWARE AS A SERVICE (SAAS).

DATE:

AIM:

To design, develop, and deploy a simple cloud-based SaaS application for a Car Booking Reservation System using Google App Engine (or Firebase Hosting) to demonstrate Software as a Service (SaaS) principles, incorporating fields for cab searches, route selection, rental/outstation booking, package types, and duration options.

PROCEDURE:

Step 1: go to zoho.com and login to your zoho account.

Step 2: select zoho creator from the available zoho applications.

Step 3: click on create new application and enter the application name as car booking reservation system.

Step 4: create a new form and add fields such as from, to, rental, outstation, package type, hours/days, date and time.

Step 5: add customer details, cab type, cab availability and fare details to the form.

Step 6: create a book now option to select the available cab and save the booking details.

Step 7: the car booking reservation software has been created successfully as a cloud-based saas application.

RESULT

The simple cloud-based SaaS Car Booking Reservation System was successfully developed and deployed to the cloud infrastructure. Users can access the web application globally via a browser to search for cabs, select locations, specify rental or outstation packages, define trip duration, and complete reservations.
