EXPERIMENT 8
STUDENT COUNSELLING SYSTEM

Create a simple cloud web application for student counselling system using any Cloud
Service Provider to demonstrate SaaS with the fields of student name, age, address, phone, subjects studied, Year of passing, percentage of marks, domain interest, etc.

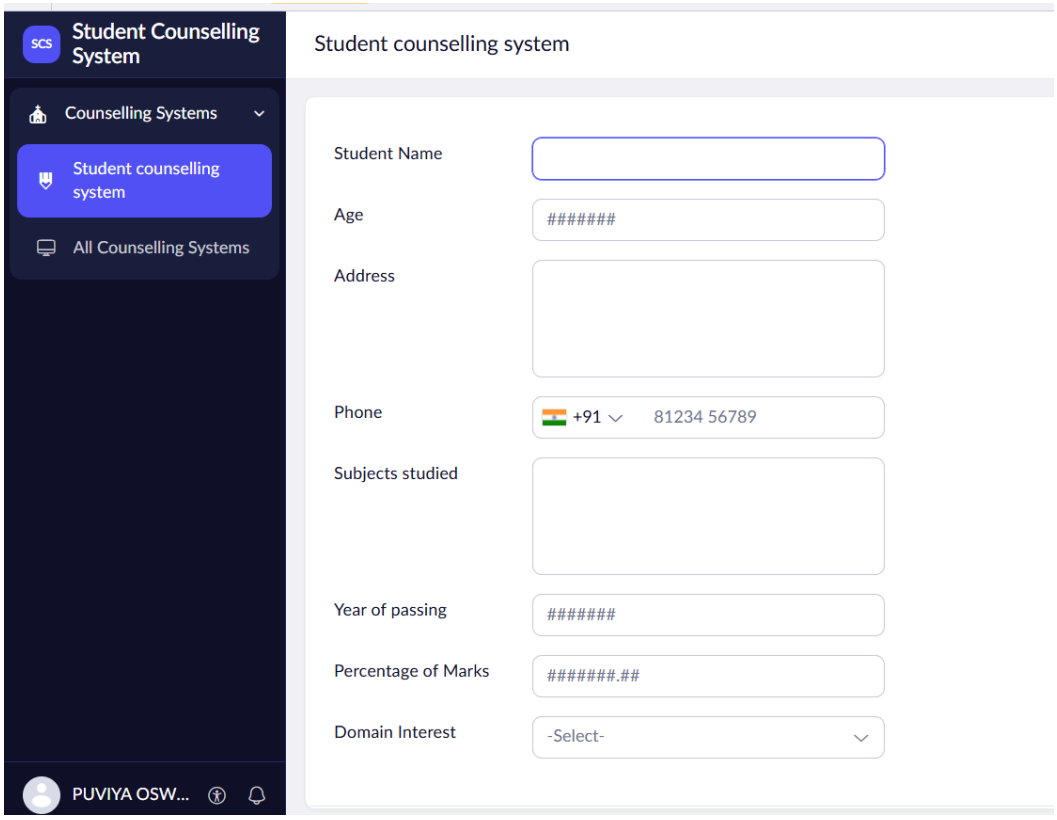

AIM:

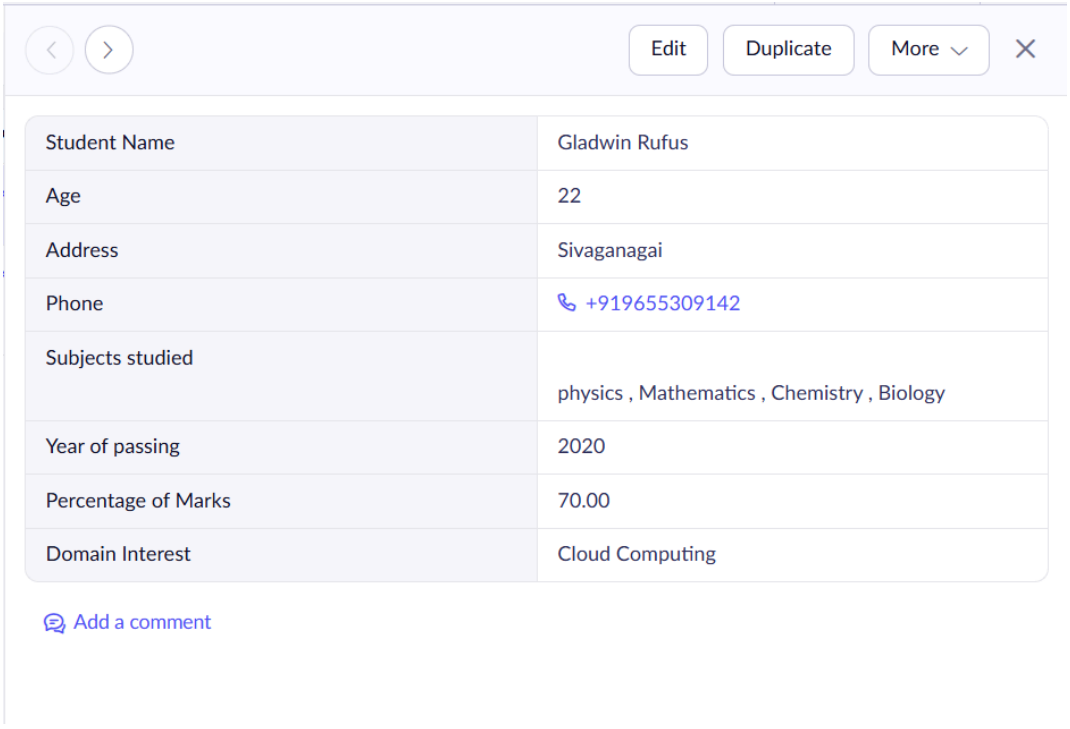

To design, build, and deploy a cloud-based **Student Counselling System** application using Zoho Creator (SaaS model) to gather student profile data, academic history, and domain preferences to automate counselling recommendations.

PROCEDURE:

1. Create App: Click Create Application > From Scratch in Zoho Creator.
2. Add Form: Drag and drop a Form component onto the builder canvas.
3. Add Inputs: Create fields for Student Name, Age, Address, Phone, Subjects Studied, Year of Passing, Percentage, and Domain Interest.
4. Set Logic: Add conditional rules to auto-generate recommendations based on Percentage and Domain Interest.
5. Publish & Run: Click Publish and open the public URL to submit student profiles and view counselling results online.

IMPLEMENTATION:

RESULT:

The cloud-based SaaS Student Counselling System application was successfully built and deployed. End-users can access the form using a public web URL, submit student academic and interest details, and automatically receive tailored counselling guidance.
