EXPERIMENT 7

STUDENT ATTENDANCE SYSTEM

Create a simple cloud software application for Students Attendance System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as name of the students, course, present , Absent, course attendance, OD request, grade, attendance percentage, etc.

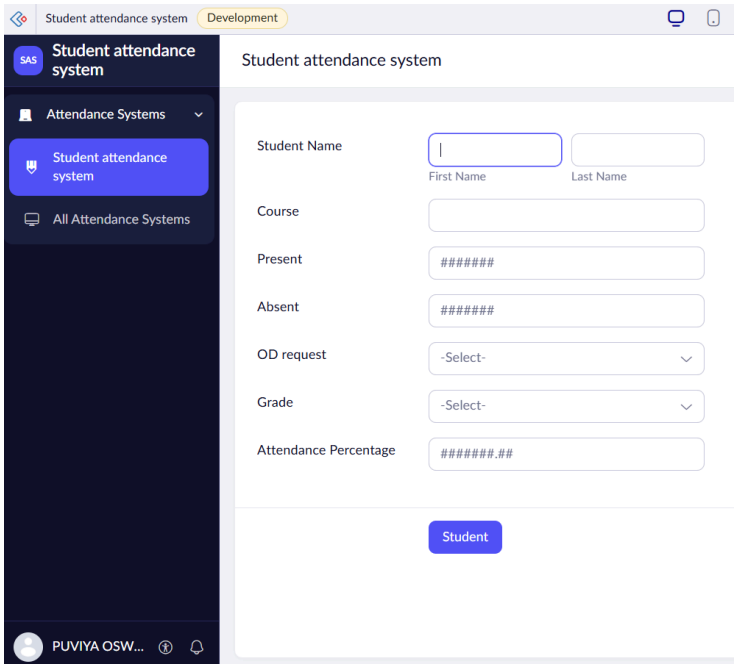

AIM:

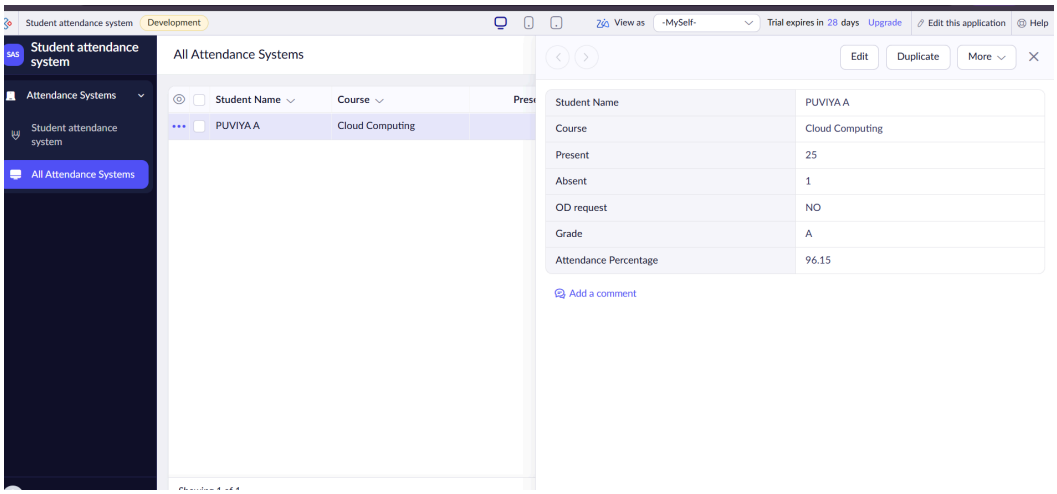

To build and deploy a cloud-based Students Attendance System using Zoho Creator (SaaS) to track student attendance, manage Absence/OD requests, compute attendance percentages, and assign eligibility grades.

PROCEDURE:

1. Create App: Click Create Application > From Scratch in Zoho Creator.
2. Add Form: Drag and drop a Form component onto the builder canvas.
3. Add Inputs: Create fields for Student Name, Course, Classes Conducted, Classes Present, Classes Absent, and OD Request Days.
4. Add Formulas: Set Total Attended (Classes Present+OD Request Days) and Attendance Percentage (Total Classes ConductedTotal Attended×100) as formula fields.
5. Set Grade Rules: Add conditional logic to assign Grade A (≥75%), Grade B (65–74%), or Grade F (<65%).
6. Publish & Run: Click Publish and open the public URL to record attendance and compute grades online.

IMPLEMENTATION:

RESULT:

The cloud-based SaaS Students Attendance System application was successfully designed and deployed. End-users can access the system via a web browser using the public link, log student attendance details (Name, Course, Present, Absent, OD Days), and automatically compute attendance percentages and eligibility grades in real-time.
