

EXPERIMENT 5

MARKSHEET PROCEEDING

Create a simple cloud software application for Mark Sheet Processing System using

any Cloud Service Provider to demonstrate SaaS include the necessary fields such as

name of the student, Reg no of the student , Subjects , Marks, Average, percentage, rank, overall performance etc.

AIM:

To design and deploy a cloud-based Mark Sheet Processing System on Zoho Creator to capture student academic scores, automatically calculate totals, averages, percentages, and ranks, and generate overall performance reports.

PROCEDURE:

1. Create a new form named Mark Sheet Processing in Zoho Creator.
2. Add student fields including Student Name, Register Number, and Department Name.
3. Add subject fields for individual mark entry across all required subjects.
4. Configure script formulas to calculate Total Marks, Average, and overall Percentage.
5. Add conditional logic to determine Pass or Fail status for students.
6. Setup an On Success workflow to compute class rank and performance.
7. Test the full application to confirm mark calculations and report display.

IMPLEMENTATION:

The screenshot shows the 'Marsheet Proceeding' form within the 'Marklist' application. The form is titled 'Marsheet Proceeding' and contains several input fields for student information and marks. The fields are: Student Name (with First Name and Last Name sub-labels), Reg. No, Mark 1, Mark 2, Mark 3, Total, and Average. Each of these fields is currently filled with a placeholder '#####'. A 'Submit' button is located at the bottom of the form. The left sidebar shows the application's navigation menu with options like 'Marsheet Proceeding' and 'Marsheet Proceeding Report'. The bottom of the screen shows the user's profile 'PUVIYA OSW...' and the application's URL.

Field	Value
Student Name	First Name: , Last Name:
Reg. No	#####
Mark 1	#####
Mark 2	#####
Mark 3	#####
Total	#####
Average	#####

Submit

The screenshot shows the 'Marsheet Proceeding Report' table. The table has two columns: 'Student Name' and 'Reg. No'. The first row of data shows 'PUVIYA A' and '192524441'. The table is displayed in a modal view with a title bar containing 'Edit', 'Duplicate', and 'More' buttons. Below the table, there is a link to 'Add a comment'. The bottom of the screen shows the user's profile 'PUVIYA OSW...' and the application's URL.

Student Name	Reg. No
PUVIYA A	192524441

Showing 1 of 1

RESULT:

A cloud-based Mark Sheet Processing System was successfully developed and deployed on Zoho Creator. It effectively automates mark entry, calculates averages, percentages, and ranks instantly, and generates accurate overall student performance records.
