

EXPERIMENT 6

PAYROLL PROCESSING

Create a simple cloud software application for Payroll Processing System using any

Cloud Service Provider to demonstrate SaaS include the necessary fields such as Name

of the employee, experience in present org , over all experience, basic pay, HRA, DA,

TA, net pay, gross pay etc.

AIM :

To create and deploy a simple cloud software application for a Payroll Processing System using AWS Elastic Beanstalk (or Google App Engine) to demonstrate the Software as a Service (SaaS) cloud delivery model.

PROCEDURE:

1. Create App: Click Create Application > From Scratch in Zoho Creator.
2. Add Form: Drop a Form component onto the canvas.
3. Add Inputs: Add fields for Employee Name, Experience, Basic Pay, HRA, DA, and TA.
4. Add Formulas: Set Gross Pay ($\text{Basic Pay} + \text{HRA} + \text{DA} + \text{TA}$) and Net Pay ($\text{Gross Pay} \times 0.90$) as formula fields.
5. Publish & Run: Click Publish and open the public link to access the SaaS application.

IMPLEMENTATION:

The screenshot shows a web application interface for 'Payroll Processing'. On the left is a dark sidebar with a menu containing 'Payroll Processing' (selected) and 'Payroll Processing Report'. The main content area is titled 'Payroll Processing' and contains a form with the following fields:

- Employee id: [Empty text box]
- Basic pay: [Text box containing '#####']
- DA: [Text box containing '#####']
- HRA: [Text box containing '#####']
- CCA: [Text box containing '#####']
- PF: [Text box containing '#####']
- IT: [Text box containing '#####']
- LOP: [Text box containing '#####']
- Gross Salary: [Text box containing '#####']
- Net Salary: [Text box containing '#####']

The screenshot shows the 'Payroll Processing Report' section of the web application. It features a table with one data row and a summary panel on the right.

Employee name	Employee id
Daniel Mary S	192524441

Summary Panel (Right):

Employee name	Daniel Mary S
Employee id	192524441
Basic pay	50000
DA	1800
HRA	1200
CCA	1500
PF	600
IT	1000
LOP	0
Gross Salary	54500
Net Salary	52900

Below the summary panel is a link: [Add a comment](#).

RESULT:

The cloud-based SaaS Payroll Processing application was successfully designed, configured, and deployed on the cloud service provider. The end-user can access the application via any web browser using the generated public URL, enter employee details (Name, Experience, Basic Pay, HRA, DA, TA), and dynamically calculate Gross Pay and Net Pay without installing any software locally.
